

Family

I have a birthday coming
I guess you know what that means
All the blokes who kinda like me
get together and throw a party

Of all the folks who'd come or write me
some will always be,
a mother, father, sister or a brother
they are part of me
they're family
yeah family

Why can't we be
more like family
with the air, the water and trees
just like family
the air could be your brother
the earth could be sisterly,
if the mountains were your mother
and your father the raging sea
it'd be like you and me,
the mountains and the sea
we'd feel like family
yeah you and me, the water and the trees
gotta be more like family

We had the birthday party
and they all stayed to clean,
All the glass and then the plastic
in the bags ready for recyclin'

The sand from the beach made the glass for the tea
and the paper is wood from the tree
the food came from the ground, the sun and the rain
I'm starting to see
we're all like family
one family

If we could only be
more like family
with the air, the water and trees
just like family
the air could be your brother
the earth could be sisterly,
if the mountains were your mother
and your father the raging sea
it'd be like you and me the mountains and the sea
we would be family
yeah you and me the tiger and the flea
all part of the biodiversity
you and me, the water and the trees
gotta be more like family
