

# Flying Tigers

A vision of the earthbound creature  
of perfect power, symmetry, and balance  
airborne in wonder over Gaia

A vision of the human creature gliding freely over the water  
with the wind in the sail, in the hand, in harmony  
with the dynamics of the natural world

The forces of gravity, rushing air  
and turbulent fluids of the earth's blood  
all combined in the elemental movements of Feng Shui  
wind and water as breath  
as  
boardsailing
