

No Rocks on Jupiter

There are no rocks, no rocks on Jupiter
and no liquid water anywhere on Mars
don't look for seasons on Mercury or Venus
and Pluto's the place without soil, it's such a bore
while Saturn's stuck with killer temperature

There are no rocks, no rocks
there's nothing even like a rock on Jupiter
it's all swirling gas
kinda down and out
there's not a single drop
of that stuff we call water on Mars
just might be nowhere else
in the universe

There are two things that glue the universe together
that's gravity and the other is electrical force
one place they are in perfect balance it's so clever
it's a special place that's got it all and more
yeah it's the place of rocks and water
it's a blazing case of soil and weather

There are no rocks, no rocks
there's nothing even like a rock on Jupiter
it's all swirling gas
kinda down and out
there's not a single drop
of that stuff we call water on Mars
just might be nowhere else
in the universe

It's just an amazing world this living earth
can you feel it?
feel the story of the universe
there's hope we can preserve
our place of birth if the humans
start to feel the story of the universe

Inst Sax/Guitar Melody (lengthen it out)

There are no rocks on Jupiter
So let's check out the rocks here on Earth Earth Earth Earth

There are no rocks no rocks on Jupiter, Jupiter
So let's check out the rocks here on Earth
yeah let's check the rocks out here on Earth

There are no rocks on Jupiter (or most any star)
So check out the rocks here on Earth Earth Earth Earth
yeah let's check the rocks out here on earth
(whisper) yeah let's check the rocks out here on Earth
check out the rocks here on Earth
yeah check out the rocks here on Earth
